HELIX BIOPHARMA CORP. ANNOUNCES FISCAL 2023 YEAR-END RESULTS

(Toronto, Ontario) – Helix BioPharma Corp. (TSX: “HBP”), (“**Helix**” or the “**Company**”), a clinical-stage biopharmaceutical company developing unique therapies in the field of immuno-oncology based on its proprietary technological platform DOS47, today announced financial results for the 2023 fiscal year ended July 31, 2023.

OVERVIEW

The Company reported a net loss and total comprehensive loss of \$6,290,000 for the year ended July 31, 2023, (July 31, 2022 - \$6,563,000) and a loss of \$0.03 per common share (July 31, 2023– loss of \$0.04 per common share).

Clinical development

LDOS47 in lung cancer

The Phase II study of combination therapy in lung cancer (LDOS003) was halted in the dose escalation portion of the study in 2020 at the height of pandemic lockdown and the final clinical trial report was further delayed amidst war in Ukraine where all subjects were recruited. The company is now preparing to submit the final clinical study report to regulatory authorities later this month.

LDOS47 in pancreatic cancer

The Company's Phase I-b/II combination trial in pancreatic cancer (LDSOS006) continues to recruit patients, now in the fourth dosing cohort (13.55 µg/kg), after successfully completing the second dosing cohort (9 µg/kg) in July 2023. We remain committed to this study.

Another important aspect of the development of the LDOS47 platform is the combination with chemo- and/or immuno-therapy to enhance current therapies, that may boost the utility of the platform. The Company continues to engage several key opinion leaders to evaluate potential combinations for partnership opportunities in other CEACAM6 expressing tumors.
